1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

-Paragraph [0010], last line:

"DRAWINGS" after "BRIEF DESCRIPTION OF THE" has been changed to --FIGURE--.

2. The following is an examiner's statement of reasons for allowance:

U.S. Patent No. 5,498,823 (hereinafter referred to as Noble et al) is considered the closest prior art. Noble et al teach a method for effectively separating an unsaturated hydrocarbon from a feedstock containing at least two similar unsaturated hydrocarbons comprising passing the feedstock over one side of an ionopore membrane including perfluorosulfonic acid membrane and recovering from a second side of membrane permeate containing predominantly one of the at least two similar unsaturated hydrocarbons (see abstract; col. 2, lines 30-49; col. 3, lines 39-50; col. 4, lines 18-32). However, Noble et al neither teaches or suggests the step of separating sulfur compounds from a hydrocarbon mixture using an ionic membrane wherein sulfur compounds of hydrocarbon mixture is selectively permeated through the membrane forming sulfur-rich permeate and sulfur-lean retentate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The information disclosure statements submitted on 3/26/02, 5/15/02 and 12/10/02 have been considered by the examiner.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 6,187,196 teaches the method of separating a more highly unsaturated organic compound from a less highly unsaturated organic compound by using an ionic membrane.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kim whose telephone number is (703) 308-2350. The examiner can normally be reached on weekdays from 7:00 AM - 3:00 PM.
